Headline : 'Grigne Pains' - A new generation of bread scoring machines

Description : Grigne Pains - a new generation of automatic scoring machine reproduce the traditional baker's working which consists in slashing the dough with a blade between the fermentation phase and baking. Different sizes of baking trays may be used. The length, depth and angle of the cut (straight or oblique) are all adjustable. The scoring speed and regularity are impressive. For example, it takes less than 2 minutes to score 200 baguettes with 7 cuts on each one.
